Brand architecture

itel energy belongs as part of the core brand of itel.

The itel energy brand is used specifically for offline retail stores and experience, which sell the itel product range.

Core brand

Sub-brand

itel Energy logo

The itel Energy logo is an extension of our primary brand logo as a sub-brand mark. It uses the same typography from our wordmark, allowing it to feel clearly part of the itel brand architecture.

Logo construction

Our sub-brand logos have been crafted to sit alongside the core brand identity. For visual balance, it follows the same type and scale as the wordmark.

The spacing between the elements are defined according to the format. For our horizontal lockup, the spacing uses the 'l' from the itel wordmark, and is aligned to the italic angle of 'Energy'. For the vertical lockup, the space between the core logo and the 'Energy' wordmark is defined using 13% of the core logo.

Lockups

We have a horizontal and vertical lockup for itel energy. We use the different versions depending on sizing and format requirements of our applications.

Horizontal Lockup

Vertical Lockup

Logo clearspace

We follow the same clearspace rules as our primary logo by using the 'e' from the primary wordmark.

=Clearspace margin

Logo colour

Our primary logo for the itel energy brand is Red on White background.

Our itel energy logo suite follows the same colour range as the core itel brand mark.

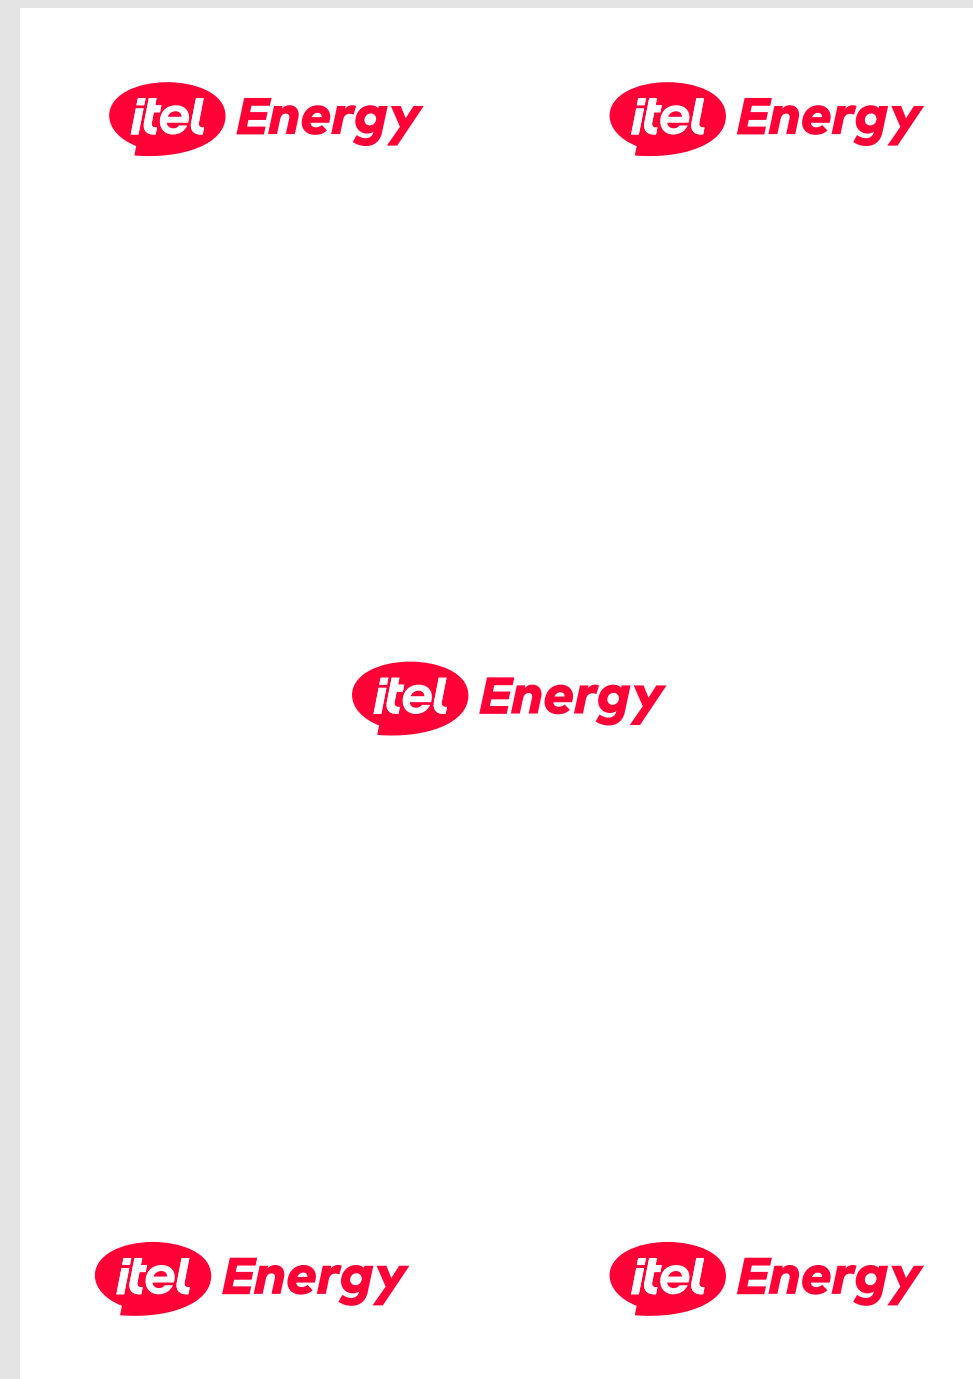

Horizontal lockup placement

Our logo can be positioned in various ways across different formats. Please follow the guidance when applying the itel energy logo across key applications.

Portrait

Landscape

Vertical lockup placement

Our logo can be positioned in various ways across different formats. Please follow the guidance when applying the itel energy logo across key applications.

Portrait

Landscape

Minimum size

When using our itel energy logo, consider the minimum size at which it should be produced, to avoid loss of legibility in our brand mark.

Horizontal Lockup

Minimum size
8mm H/23px H

Vertical Lockup

Minimum size
13mm H/38px H

Misuse

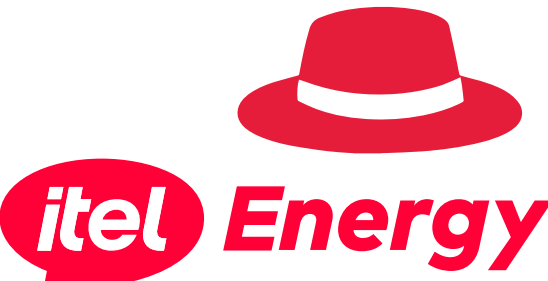

Here are examples of the improper use and treatment of our itel energy brand.

Do not apply effects to the logo.

Do not create other lockups of itel Home.

Do not embellish the logo.

Do not change the colours of the logo.

Do not change the typography of the wordmark.

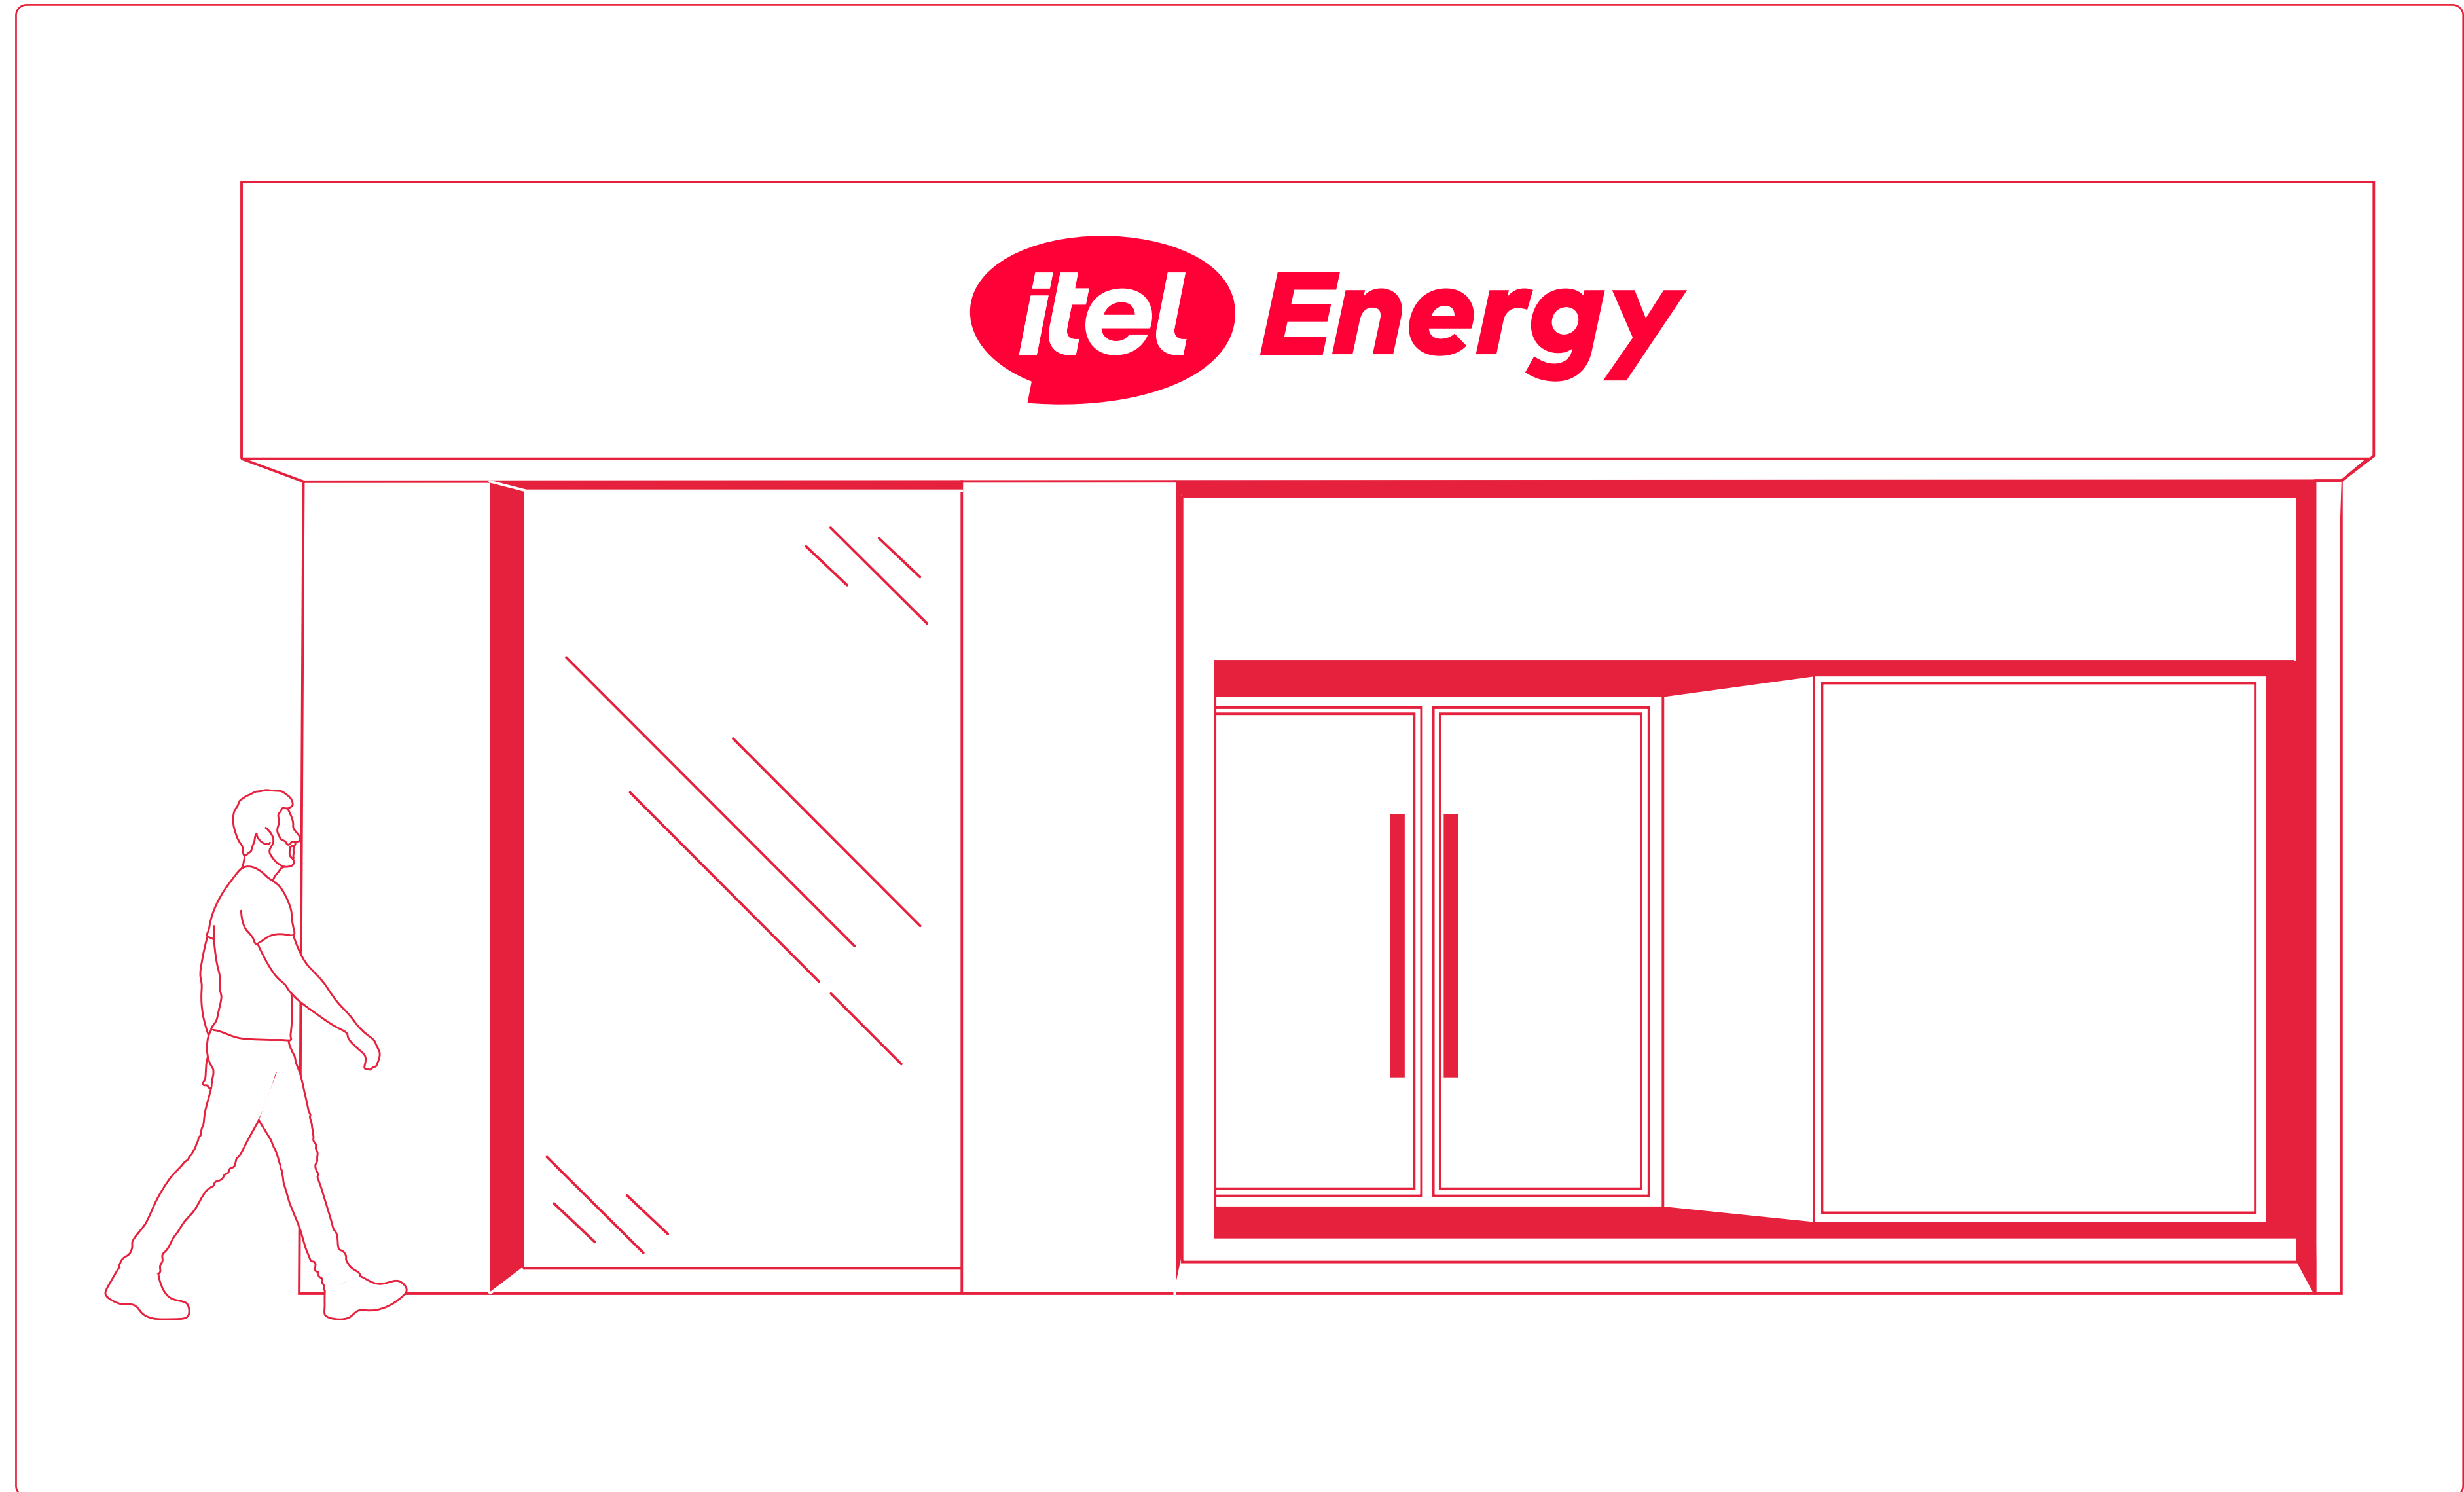

Do not split the wordmark.

Colour pairings

We always prioritise Red as the leading colour when combining different colours. It is crucial to maintain a distinct contrast between the two colours. Shown below are the acceptable colour combinations.

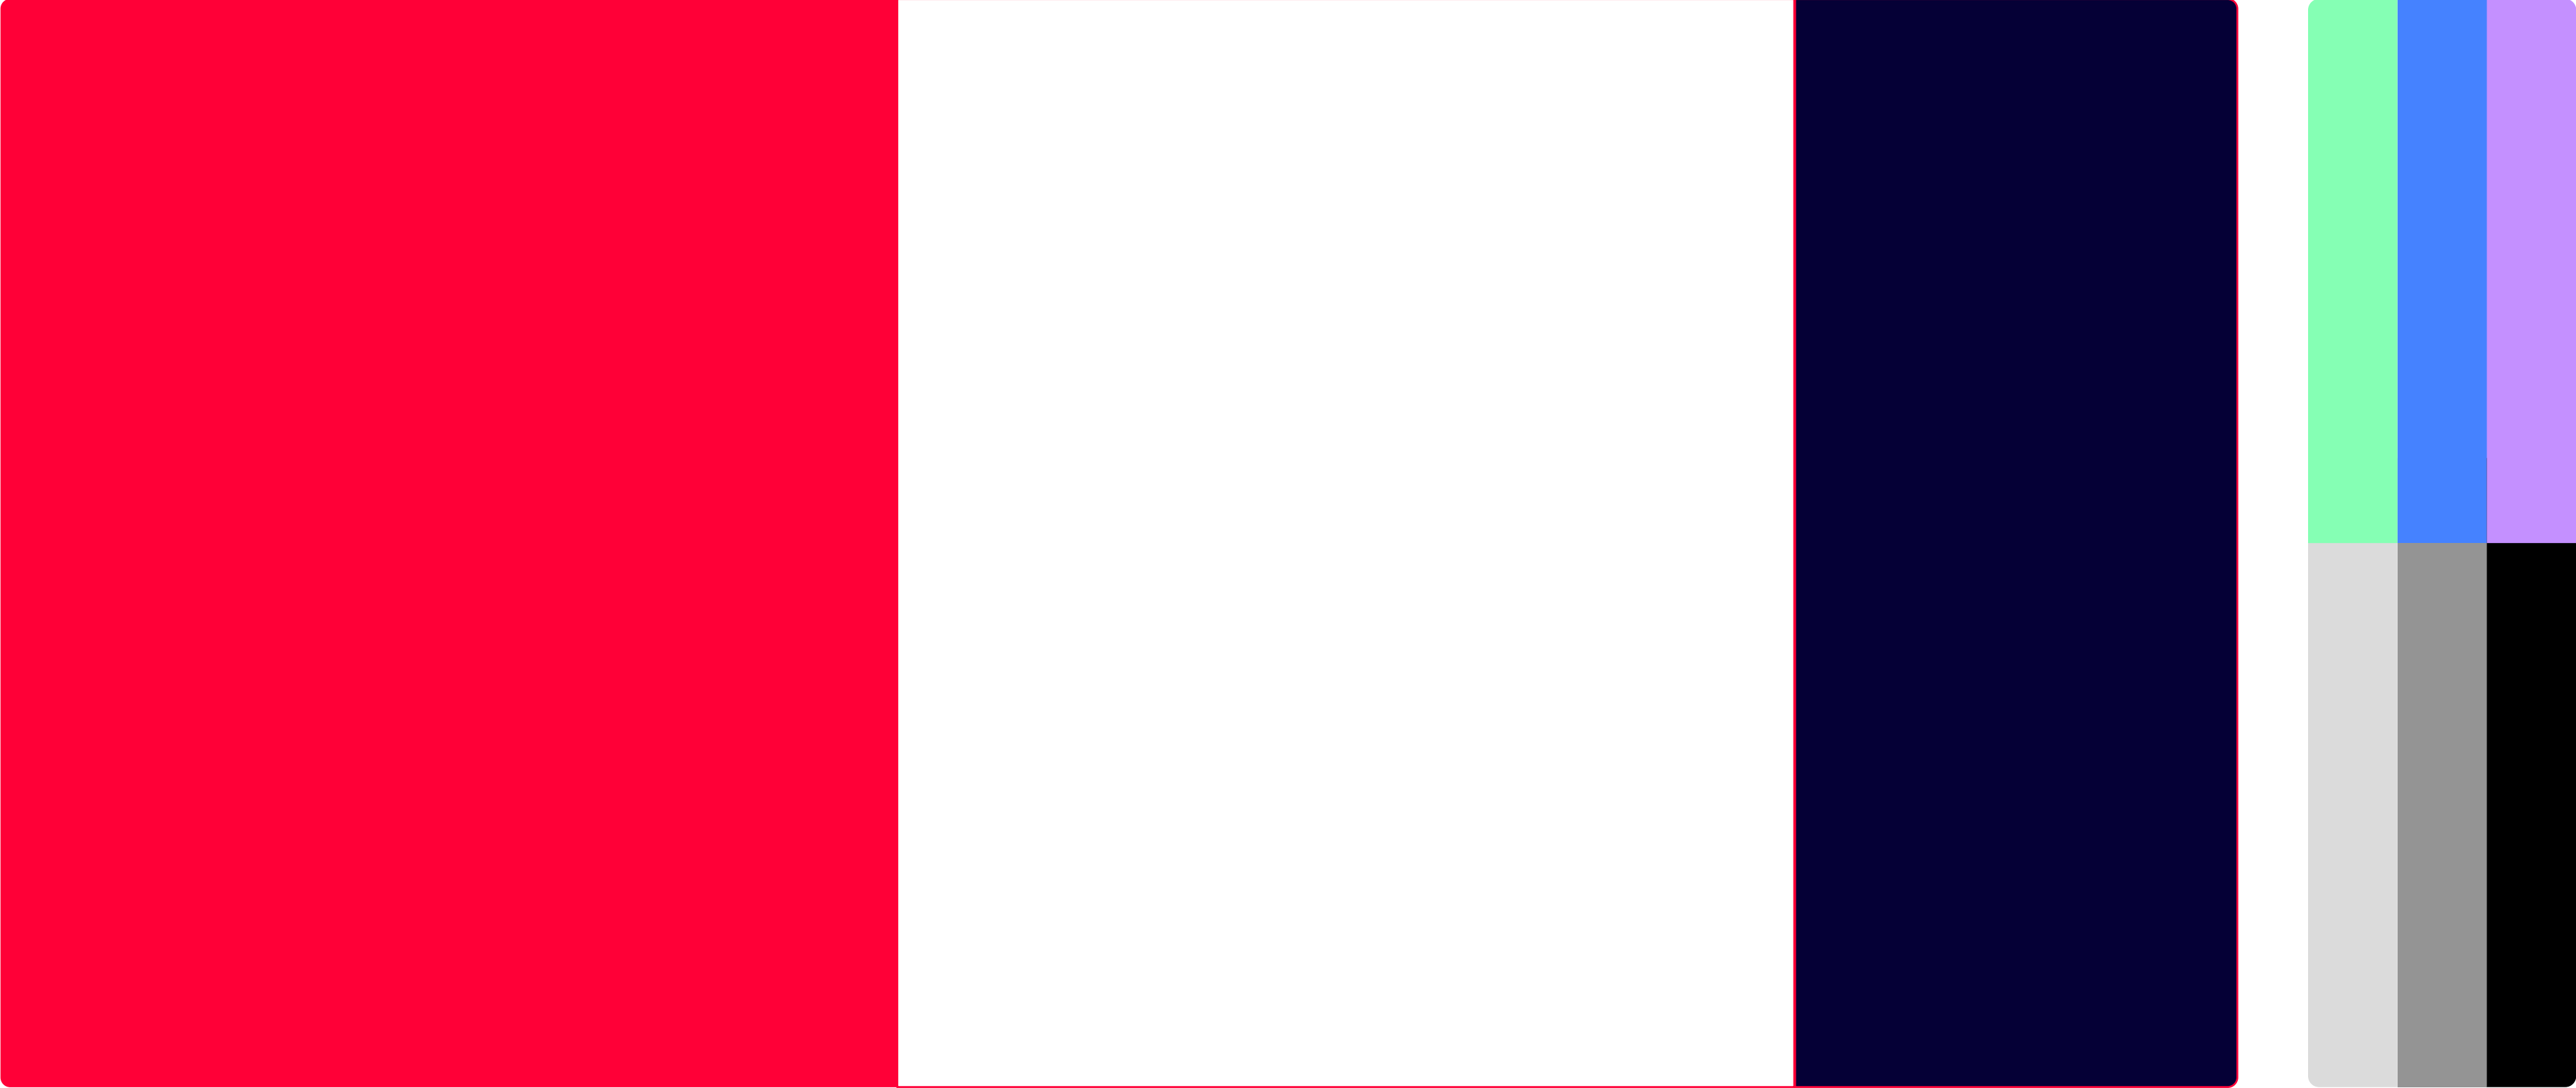

Colour proportion

Our brand uses Red and White as the main colours, with Red being the key brand identifier in the market. Secondary colours are used for expression with merchandise and brand collateral but should not be used in core consumer communications.

Text on colour

In order to maintain brand consistency and ensure clear legibility, we adhere to specific combinations of color and text that are similar to our logo. By doing so, we create a cohesive visual identity that is easily recognizable and reinforces our brand image.

**White text on
Grey tint 2 background**

Text on secondary colours

We typically avoid using secondary colours as backgrounds in the majority of our communications. However, there may be specific executions, such as packaging, where the use of an extended colour palette is necessary. In such instances, our primary concern is always legibility, achieved by using White or a dark tone over the vibrant secondary colours.

UI tints

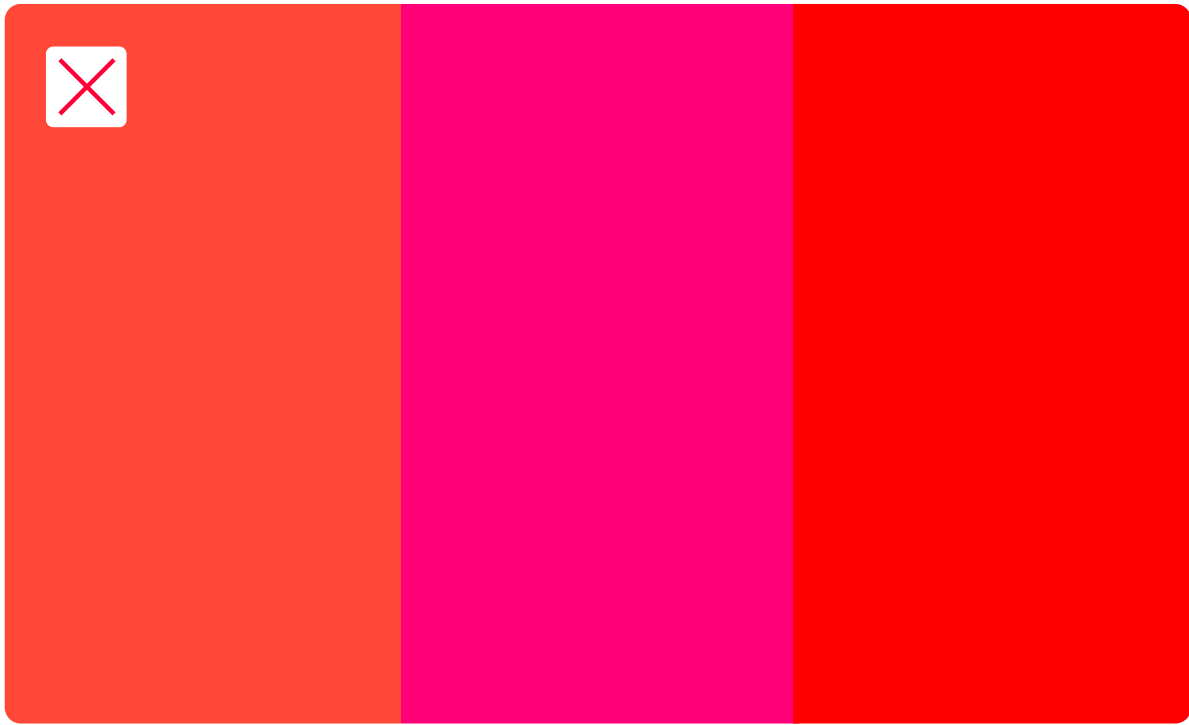

When developing digital applications for our brand,especially for our website, it may be necessary to utilise tints for on-screen usage and to enhance accessibility.The following are the approved tints that can be used when constructing digital interfaces.

20% #ffccd7	20% #ceccd5	5% #f2f2f2
40% #ff99af	40% #9d99ab	15% #d9d9d9
60% #ff6687	60% #6b6682	40% #949494
80% #ff335f	80% #3a3358	60% #666666
Red	Dark Blue	Black

Misuse

Here are examples of the improper use and treatment of colour.

Do not create alternate Red colours for the brand.

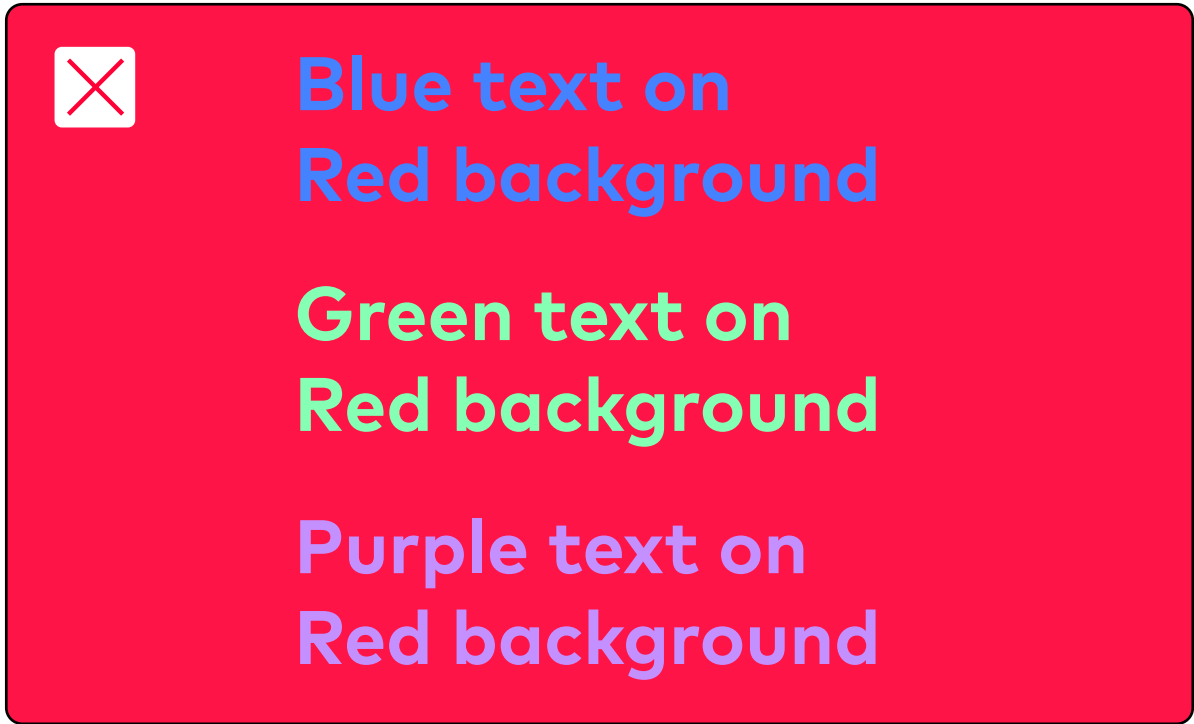

Do not use tints with the logo.

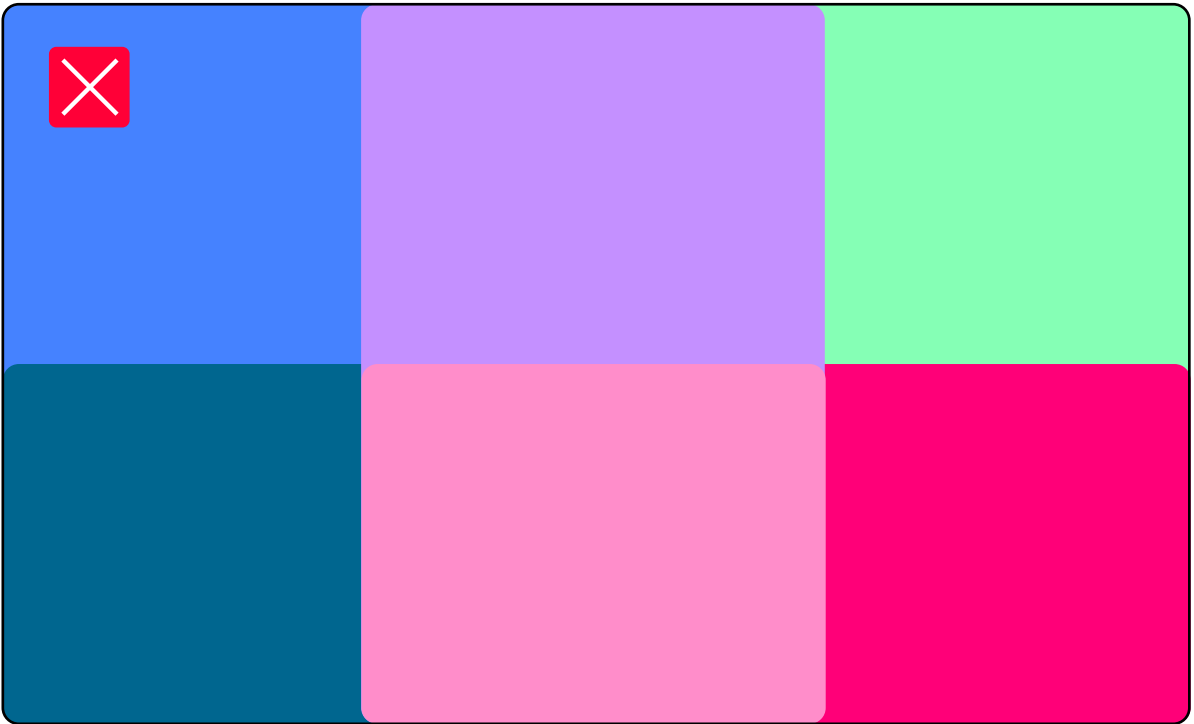

Do not use gradients within the brand or logo.

Do not use the secondary colours with the itel logo in communications.

Do not use alternate colours as text on Red backgrounds.

Do not create alternate colours from the secondary palette.

Typography

Overview

Our typography is unique and easy to use. The following guidance allows for clear and confident messaging across all our communications.

Mark OT

AaBbCcDd

Our typeface

Mark OT is our primary typeface. The spherical forms mimic the interior shape of the itel speech bubble.

Hierarchy and settings

The following are the recommended type settings that should be adhered to when applying typography to all our communications, both online and offline.

Always keep in mind that our subhead is consistently set at 100%, and all other settings adjust accordingly to match the subhead size.

Headline

IP66

(At least 200% of subheading)

Font: Mark OT Bold / Italic
Size: 220pt
Leading: 220pt (100-110% type size)
Kerning: Optical
Tracking: -30
Alignment: Left
Case: Sentence or All Caps

Subhead

12kW

(Subheading = 100%)

Font: Mark OT Bold / Italic
Size: 100pt
Leading: 120pt (120% type size)
Kerning: Optical
Tracking: -30
Alignment: Left
Case: Sentence

Product feature

1000kWh

(50% of subheading)

Font: Mark OT Medium
Size: 50pt
Leading: 60pt (120% type size)
Kerning: Optical
Tracking: 0
Alignment: Left
Case: Sentence

Product detail

12 hours

(20% of subheading)

Font: Mark OT Medium
Size: 20pt
Leading: 24pt (120% type size)
Kerning: Optical
Tracking: 0
Alignment: Left
Case: Sentence

Hierarchy and sizing

As all formats vary in size for different dimensions and output (online or offline), our typography sizes must adapt accordingly. Here are three exemplary sizes for common outputs.

The key rule is to set the Subhead at 100%, and all other type sizes scale proportionally to this. Headlines may scale beyond 250% to create a more significant visual impact.

48 Sheet billboard
(3048 mm x 6096 mm)

Headline - 200+% / 3300pt
Subhead - 100% / 1300pt
Product feature - 50% / 650pt
Body copy - 20% / 260pt

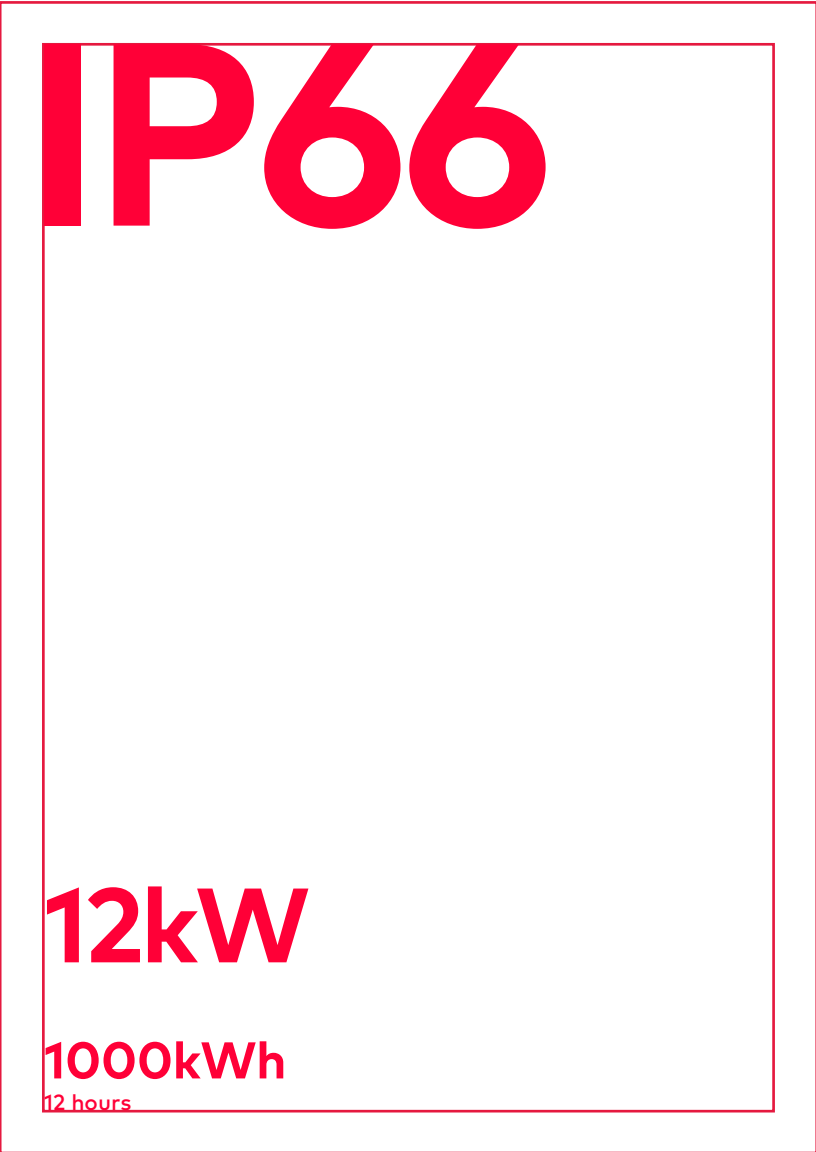

Instagram tile
(1080px x 1080px)

Headline - 200+% / 400pt
Subhead - 100% / 150pt
Product feature - 50% / 75pt
Body copy - 20% / 30pt

A1 poster
(594 mm x 841 mm)

Headline - 200+% / 650pt
Subhead - 100% / 200pt
Product feature - 50% / 100pt
Body copy - 20% / 40pt
